

In September 2016 we went to Ruanda (East Africa) for the first time. During our two weeks stay we recognized lots of problems and decided to help.

The 13th December 2017 we founded „Ruanda Hilfe Unterlüß“, an organization whose charitable nature was officially confirmed in June 2018.

It is a most important matter of heart to us to support people to help themselves. We want to promote the following projects:

Women's project in Cyanguqu

Cyanguqu is located by the Kivu Lake in the southwest of the country. A house for women and widows of all ages is planned to be built on a plot near the lake. It is planned to provide a meeting point and centre of communication with different rooms for education and trainings.

Women and widows in front of the new building

Women will get training in the fields of farming, cooking and tailoring in order to care for themselves and to live independently.

Next to the women's house is a primary school so that children and women can learn at the same time but in different places close to each other.

Construction meeting with the architect

Lunch at school or food for poor people

Many children do not get hot meals regularly. So members of the sisterhood of nuns cook and provide daily meals for 160 children.

We want to support the project in Karege financially so that necessary ingredients will continue to be available and hot meals can be cooked.

Essential things are often missing in Karege primary school like water or food. Only children who own a school uniform are allowed to go to school - which only a few families can afford. Donations are used to buy fabrics to sew school uniforms with. In this way necessary conditions are created for children to have access to school.

Martina Tolle with elementary school children serving a hot meal.

The families gladly accept the offer and are very grateful.

Support in the production of food for the poor.
